¹ Semiconductor companies are defined as companies that have a material percentage of revenues related to the sale of CPUs/APUs/GPUs, packaged chips, manufactured chips, sale of equipment or materials used in the production of chips, sale of equipment or materials used in the production of chip equipment, materials used for chip production, or software used for CHIPS production. Tiering for these companies will be based on this revenue.

The below table outlines the pricing framework for Affiliate members:

Membership Segments	Pricing structure <i>All priced flat</i>
Workforce stakeholders (including academic institutions not focused on semi-R&D, Economic Development Agencies, and labor unions)	\$2,000
Federal Government agencies not focused on semi R&D	\$0
Investors	\$2,000
Corporate advisory and legal services (e.g., consulting firms, law firms)	\$5,000
Other non-profits that are related to the semiconductor ecosystem but do not conduct R&D	\$5,000
